

14-2-4

with L-Amino Acids

Foliar-Pak® 14-2-4 provides reliability and controlled turfgrass growth under any environmental condition.

PRODUCT DESCRIPTION/BENEFITS

Foliar-Pak 14-2-4 is a high-performance foliar fertilizer containing iron, manganese, and our proprietary L-amino acid package which increases nitrogen fixation and chlorophyll production.

- Foliar-Pak 14-2-4 offers safe, effective nutrition for instant color response and long-term feeding with 40% of the nitrogen being controlled release. Foliar-Pak 14-2-4 continues to impress days after the initial application.
- The proprietary amino acid package in Foliar-Pak 14-2-4 will improve uptake and enhance the overall performance of other nutrients, plant growth regulators, and fungicides in the tank mix.
- The proprietary amino acid formulation is designed to help the plant build better energy through increased photosynthesis and more efficient protein production, resulting in increased carbohydrate reserves.
- Consistent use of Foliar-Pak 14-2-4 leads to controlled top growth, carbohydrate balance, and better root growth.

GENERAL USE GUIDE

This product is tank mix compatible with most fertilizers and pesticides. However, due to variability in water sources and pesticide formulations, a compatibility test is recommended.

Golf Course Greens	Apply 3.0 to 12.0 fl oz per 1,000 sq ft in enough water to provide sufficient foliar coverage. Repeat application every 7 to 14 days. Transition and warm season turf may require more frequent applications.
Golf Course Tees and Fairways Sports Turf	Apply 3.0 to 9.0 fl oz per 1,000 sq ft in enough water for sufficient foliar coverage. Repeat application every 2 to 4 weeks.
Lawns	Apply at 2 to 5 gal per acre in enough water for sufficient foliar coverage. Use the lower rates if daytime temperatures exceed 85°F or if turf is exhibiting symptoms of drought stress.
