22-0-4 with L-Amino Acids

**PRODUCT DESCRIPTION/BENEFITS**
Foliar-Pak 22-0-4 provides a consistent release of nitrogen to the plant, perfect for higher cut turf. This formulation provides a unique balance of macro and micronutrients resulting in an immediate and long-lasting color response.

- Foliar-Pak 22-0-4 is a great tank mix partner that provides an extended color response on higher cut turf.
- Foliar-Pak 22-0-4 contains iron and manganese to increase color and photosynthesis.
- Foliar-Pak 22-0-4 contains a complete amino acid package at a concentration level appropriate for use on higher cut turf.
- Triazine urea increases overall foliar performance and length of color providing a growth response ideal for fairways and higher cut turfgrass.

Derived from: soy protein hydrolysate, urea-triazine solution, low biuret urea, potassium phosphate, potassium nitrate, iron EDTA, manganese EDTA

*Slowly available nitrogen from urea-triazine nitrogen

**PRODUCT INFORMATION:**

- **Nitrogen Rates**
  - 3 fl oz = 0.05 lbs N per 1000 sq ft
  - 4 fl oz = 0.07 lbs N per 1000 sq ft
  - 5 fl oz = 0.09 lbs N per 1000 sq ft
  - 6 fl oz = 0.11 lbs N per 1000 sq ft
  - 9 fl oz = 0.17 lbs N per 1000 sq ft
  - 15 fl oz = 0.28 lbs N per 1000 sq ft

**GENERAL USE GUIDE**
This product is tank mix compatible with most fertilizers and pesticides. However, due to variability in water sources and pesticide formulations a compatibility test is recommended.

**Golf Course Greens**
Apply 3.0 to 12.0 fl oz per 1,000 sq ft in enough water to provide sufficient foliar coverage. Repeat application every 7 to 14 days. Transition and warm season turf may require more frequent applications.

**Golf Course Tees and Fairways**
Apply 3.0 to 9.0 fl oz per 1,000 sq ft in enough water for sufficient foliar coverage. Repeat application every 2 to 4 weeks.

**Lawns**
Apply at 2 to 5 gal per acre in enough water for sufficient foliar coverage. Use the lower rates if daytime temperatures exceed 85°F or if turf is exhibiting symptoms of drought stress.
