

Armament® Concentrate

0-0-9

Foliar-Pak® Armament Concentrate is a high-molecular-weight amino acid polymer that complexes nutrients and improves their availability in the soil.

PRODUCT DESCRIPTION/BENEFITS

Armament technology is a patented, biodegradable nutrient enhancer. This high molecular weight structure holds a large population of negative charges. These negative charges gently complex positively charged metals, keeping them in solution.

Apply Foliar-Pak Armament Concentrate with routine fertilizer applications for deeper, stronger roots, more resilient turf and longer lasting color.

- Foliar-Pak Armament Concentrate increases nutrient uptake and ensures predictable nutrient availability.
- Foliar-Pak Armament Concentrate unlocks the tied-up nutrients that already exist in the soil, turning them into plant usable nutrition.
- Armament technology prevents nutrient-to-nutrient interactions and chemical changes in the spray tank and the soil.
- Completely biodegradable and will not accumulate in the environment.
- Acting as a buffer, Foliar-Pak Armament Concentrate can be used in high pH and hard water.

GUARANTEED ANALYSIS

Soluble Potash (K₂O)..... 9.0%

Derived from: potassium acetate

NON PLANT FOOD INGREDIENT

Polymer 38.0%

PRODUCT INFORMATION:

Weight per Gallon at 68°: 10.59 lbs (4.8 kg)
pH: 7.2

GENERAL USE GUIDE

This product is tank mix compatible with most fertilizers and pesticides. However, due to variability in water sources and pesticide formulations a compatibility test is recommended.

Sports Turf Lawns

Apply 0.25 to 0.50 fl oz per 1,000 sq ft (10-20 oz per acre) in enough water to provide sufficient foliar coverage.
For optimal results, apply at least 3 applications per season.

Hydro-Mulch Seeding

Mix 0.25 to 1.5 fl oz into seeding tank with appropriate water volume to treat 1000 sq ft.

Trees and Ornamentals

Use 16 to 64 fl oz of product per 100 gallons of water.
Bedding Plants and Hanging Baskets:
Drench 1 gal of finished solution per 20 sq ft of planted area (do not treat general bed space). Treat each annual plant as if it covers 1 sq ft.
For optimal results, fertilize every 2 weeks.
Shrubs and Trees:
Drench 1 gal of finished solution per 1" diameter of tree or shrub. In areas where turf is present, inject the solution into the soil.
