## GENERAL USE GUIDE

F1502

This product is tank mix compatible with most fertilizers and pesticides. However, due to variability in water sources and pesticide formulations a compatibility test is recommended.

<b>Sports Turf Lawns</b>	Apply 0.25 to 0.50 fl oz per 1,000 sq ft (10-20 oz per acre) in enough water to provide sufficient foliar coverage. For optimal results, apply at least 3 applications per season.
<b>Hydro-Mulch Seeding</b>	Mix 0.25 to 1.5 fl oz into seeding tank with appropriate water volume to treat 1000 sq ft.
<b>Trees and Ornamentals</b>	Use 16 to 64 fl oz of product per 100 gallons of water. <b>Bedding Plants and Hanging Baskets:</b> Drench 1 gal of finished solution per 20 sq ft of planted area (do not treat general bed space). Treat each annual plant as if it covers 1 sq ft. For optimal results, fertilize every 2 weeks. <b>Shrubs and Trees:</b> Drench 1 gal of finished solution per 1" diameter of tree or shrub. In areas where turf is present, inject the solution into the soil.
