

**Foliar-Pak®**

## AERATION RECOVERY (Warm Season)

Your golfers will thank you! Treat your aerated turf with a complete foliar program, including natural plant extracts and active L-amino acids. Give your turf the necessary advantage for rapid recovery. This warm season turf program results in more rapid closure of core cultivation holes, improved turf recovery, and higher quality turf. With the use of this program, nitrogen applications for the purpose of aeration recovery can be considerably reduced.

**Apply this program 3 days prior to aeration and again 7 days after aeration.**

### **Foliar-Pak® Foundation Forty | 1 oz per 1,000 sq ft**

A highly concentrated blend of specific amino acids to increase plant energy, build proteins, and improve carbohydrate storage. Improves plant metabolism, especially photosynthesis, and enhances the uptake of other nutrients and spray tank additions.

### **Foliar-Pak® Grow-In | 9 oz per 1,000 sq ft**

Foliar-Pak Grow-In takes the guess work out of building a program for turfgrass establishment. Combines the foliar nutrients most necessary for rapid turfgrass establishment into one jug.

### **Foliar-Pak® Micros Plus | 2 oz per 1,000 sq ft**

Improves lateral growth of stolons and rhizomes, and enhances foliar recovery. Micros Plus improves cell division, nutrient use, and photosynthetic properties, and helps turf maintain healthy green color.

### **Foliar-Pak® Armament® P | 3 oz per 1,000 sq ft**

Phosphorus is essential for protein synthesis, cell division, and the development of new tissue. Armament P increases phosphorus availability by preventing common soil nutrient interactions that tie up phosphorus.

Armament technology is a patented, biodegradable nutrient enhancer. This high-molecular weight structure holds a large population of negative charges. These negative charges gently complex positively charged metals, keeping them in solution.

*Optional Addition:*

### **Foliar-Pak® Colonise® Bio | 1.5 – 3 oz per 1,000 sq ft**

Colonise Bio is a highly specific blend of live biology, carbon sources and nutrient enhancers. Colonise Bio contains Armament, AminoPrecise® and Colonise technologies to target better rooting, nutrient uptake, plant resilience, and turf playability.
