

Bio Sea

0.1-0-0.1

Foliar-Pak® Bio-Sea is an *Ascophyllum nodosum* liquid seaweed extract harvested from the coast of Norway. The cold process extraction method used in this unique product preserves the integrity of the natural ingredients, amino acids, organic acids, sugars and plant hormones.

PRODUCT DESCRIPTION/BENEFITS

- Foliar-Pak Bio Sea is an *Ascophyllum nodosum* liquid seaweed extract harvested from the coast of Norway. The cold process extraction method used in this unique product preserves the integrity of the natural ingredients, amino acids, organic acids, sugars and plant extracts.
- Bio Sea is more effective because the plant derived ingredients are more structurally complete, therefore, they remain more bio-active than other fertilizers.
- Natural betaines and organic acids regulate at the cellular level to ensure the plant is protected from stress.
- This rich source of natural plant extracts works to enhance new root growth, new shoot growth, and photosynthesis while delaying chlorophyll degradation.

GUARANTEED ANALYSIS

Total Nitrogen (N) 0.1%
 0.1% Water Soluble Organic Nitrogen
 Soluble Potash (K₂O)..... 0.1%

Derived from: seaweed extract (*Ascophyllum nodosum*)

NON PLANT FOOD INGREDIENTS

Cold Process Seaweed 12%

GENERAL USE GUIDE

This product is tank mix compatible with most fertilizers and pesticides. However, due to variability in water sources and pesticide formulations a compatibility test is recommended. Shake well.

Golf Course Greens	Apply 1.5 to 4.0 fl oz per 1,000 sq ft in enough water to provide sufficient foliar coverage. Repeat application every 7 to 14 days. May be combined with liquid fertilizers, other bio-stimulants, and surfactants
Fairways, Tees And Athletic Turf	Apply 1/2 to 1 gal per acre in enough water to provide sufficient foliar coverage. Repeat every 2 to 4 weeks. Recovery and Grow-In: Apply 1.5 to 3 fl oz per 1,000 sq ft every 7 days or 3.0 to 6.0 fl oz per 1,000 sq ft every 14 days.
Shrubs and Ornamentals	Drench with 1.0 to 2.0 fl oz per gal of water at transplant or throughout the growing season. Repeat drench every 14 to 28 days. Foliar applications can be made with 1.0 to 2.0 fl oz per gal of water every 14 to 28 days.
