

Calcium

7-0-0 with L-Amino Acids

Foliar-Pak® Calcium is a concentrated calcium product that is complexed by amino acids and other natural plant metabolites.

PRODUCT DESCRIPTION/BENEFITS

Foliar-Pak Calcium is a newly formulated fertilizer that increases turf growth by offering the following advantages:

- Focused amino acid package increases photosynthetic efficiency, and prolongs life of chloroplasts.
- Multiple complexors and chelators provide a dramatic increase in uptake efficiencies.

Triple Protected Calcium

Foliar-Pak Calcium is a brand new formulation using three natural and modified plant metabolites specific for protecting calcium.

Each plant metabolite performs well in its own niche. The low-molecular-weight plant metabolites allow for movement through the stomatal pores and transcuticular pores; the high-molecular weight modified plant metabolite chelates the calcium for secondary uptake via the soil. This engineered redundancy ensures rapid uptake and longer nutrient availability in all growing conditions.
