

# ULTIMATE SPORTS TURF PACKAGE MAINTENANCE

From seeding and establishment to maintenance and recovery, the **Foliar-Pak Ultimate Sports Turf Package** offers comprehensive programs designed to take the guess work out of turf management.

The **Maintenance** program incorporates Foliar-Pak, Healthy Grow and Armament technologies to maximize turf health, increase stress tolerance, and prepare athletic turf for high traffic events.

## 1 1<sup>ST</sup> DAY:

### Foliar-Pak<sup>®</sup> Grow-In

Ideal for recovery of turf damaged by biotic or abiotic stresses. Combines the foliar nutrients required for rapid turfgrass establishment and recovery.

**RATE: 9 TO 12 oz/1000**

(use if this is the first application of the spring)

OR

### Foliar-Pak<sup>®</sup> Play-On

Combines the foliar nutrients necessary for maintaining turfgrass health throughout the season while providing consistent, controlled growth and long-lasting color.

**RATE: 9 TO 15 oz/1000**

PLUS  
GRANULAR

### Healthy Grow<sup>®</sup> + Armament<sup>®</sup> 2-4-3

Aerobically composted chicken manure (ACCM) infused with a biological metacatalyst that promotes beneficial microbial activity in and around the soil and plants.

**RATE: 400 lbs/acre**

OR

### ATS 22-0-4 w/Armament<sup>®</sup>

Contains 50% polymer sulfur coated urea (PSCU) and is coated with Armament for improved efficiency and nutrient uptake.

**RATE: 150 lbs/acre**

## 2 14<sup>TH</sup> DAY:

### Foliar-Pak<sup>®</sup> Grow-In

Ideal for recovery of turf damaged by biotic or abiotic stresses. Combines the foliar nutrients required for rapid turfgrass establishment and recovery.

**RATE: 9 TO 12 oz/1000**

(use if this is the second application of the spring)

OR

### Foliar-Pak<sup>®</sup> Play-On

Combines the foliar nutrients necessary for maintaining turfgrass health throughout the season while providing consistent, controlled growth and long-lasting color.

**RATE: 9 TO 15 oz/1000**

### 3 28<sup>TH</sup> DAY:

#### Foliar-Pak<sup>®</sup> Play-On | RATE: 9 TO 15 oz/1000

Contains essential foliar nutrition, amino acids, beneficial bacteria, and Armament technology for a comprehensive solution to in-season maintenance. Promotes deeper, stronger roots for improved nutrient uptake and utilization, improved stress tolerance, and quicker recovery from heavy traffic.

### 4 6<sup>TH</sup> WEEK:

#### Foliar-Pak<sup>®</sup> Play-On | RATE: 9 TO 15 oz/1000

Contains essential foliar nutrition, amino acids, beneficial bacteria, and Armament technology for a comprehensive solution to in-season maintenance. Promotes deeper, stronger roots for improved nutrient uptake and utilization, improved stress tolerance, and quicker recovery from heavy traffic.

PLUS  
GRANULAR

#### Healthy Grow<sup>®</sup> + Armament<sup>®</sup> 2-4-3

Aerobically composted chicken manure (ACCM) infused with a biological metacatalyst that promotes beneficial microbial activity in and around the soil and plants.

RATE: 400 lbs/acre

OR

#### ATS 22-0-4 w/Armament<sup>®</sup>

Contains 50% polymer sulfur coated urea (PSCU) and is coated with Armament for improved efficiency and nutrient uptake.

RATE: 150 lbs/acre

### 5 8<sup>TH</sup> WEEK:

#### Foliar-Pak<sup>®</sup> Play-On | RATE: 9 TO 15 oz/1000

Contains essential foliar nutrition, amino acids, beneficial bacteria, and Armament technology for a comprehensive solution to in-season maintenance. Promotes deeper, stronger roots for improved nutrient uptake and utilization, improved stress tolerance, and quicker recovery from heavy traffic.

### 6 10<sup>TH</sup> WEEK:

Rotate applications for week 6 and week 8, repeating every two weeks.

During periods of high traffic that require a boost for recovery, substitute Foliar-Pak Play On with Foliar-Pak Grow-In at 9 to 12 oz/1000.

## AERIFICATION RECOMMENDATIONS:

### Non-Disruptive Aeration | EQUIPMENT: Bayonet tines, 3/8" solid tines, or 1/2" solid tines

Perform every 3 - 4 weeks or more frequently for high traffic. Increases water and oxygen movement to root zone and opens channels for better root growth.

### Core Aeration | EQUIPMENT: 5/8" coring tines or 3/4" coring tines

Begin core aeration 8 to 12 weeks after seeding and repeat at least 3 times per year. In situations where topdressing is being applied more heavily, use a 3/4" coring tine. Plugs should be mowed in order to preserve organic matter on the field.

This is a nutrient guideline for providing excellent sports turf surfaces. All situations vary. Based on soil test results, additional Foliar-Pak products should be tank mixed with Foliar-Pak Grow-In and Foliar-Pak Play-On to address soil nutrient deficiencies.
