

ULTIMATE SPORTS TURF PACKAGE MAINTENANCE

From seeding and establishment to maintenance and recovery, the **Foliar-Pak Ultimate Sports Turf Package** offers comprehensive programs designed to take the guess work out of turf management.

The **Maintenance** program incorporates Foliar-Pak, Nature Safe, and Armament technologies to maximize turf health, increase stress tolerance, and prepare athletic turf for high traffic events.

1 1ST DAY:

Foliar-Pak® Grow-In

Ideal for recovery of turf damaged by biotic or abiotic stresses. Combines the foliar nutrients required for rapid turfgrass establishment and recovery.

RATE: 9 TO 12 oz/1000

(use if this is the first application of the spring)

Foliar-Pak® Play-On

Combines the foliar nutrients necessary for maintaining turfgrass health throughout the season while providing consistent, controlled growth and long-lasting color.

RATE: 9 TO 15 oz/1000

OR

PLUS
GRANULAR

Nature Safe® 10-2-8

100% all-natural and organic homogeneous fertilizer that is well suited for soils with nitrogen and potassium deficiencies. This formulation enhances root and shoot stability with controlled plant growth.

RATE: 5 lbs/1000, 220 lbs/acre

ATS 22-0-4 w/Armament®

Contains 50% polymer sulfur coated urea (PSCU) and is coated with Armament for improved efficiency and nutrient uptake.

RATE: 150 lbs/acre

OR

2 14TH DAY:

Foliar-Pak® Grow-In

Ideal for recovery of turf damaged by biotic or abiotic stresses. Combines the foliar nutrients required for rapid turfgrass establishment and recovery.

RATE: 9 TO 12 oz/1000

(use if this is the second application of the spring)

Foliar-Pak® Play-On

Combines the foliar nutrients necessary for maintaining turfgrass health throughout the season while providing consistent, controlled growth and long-lasting color.

RATE: 9 TO 15 oz/1000

OR

3 28TH DAY:

Foliar-Pak® Play-On | RATE: 9 TO 15 oz/1000

Contains essential foliar nutrition, amino acids, beneficial bacteria, and Armament technology for a comprehensive solution to in-season maintenance. Promotes deeper, stronger roots for improved nutrient uptake and utilization, improved stress tolerance, and quicker recovery from heavy traffic.

4 6TH WEEK:

Foliar-Pak® Play-On | RATE: 9 TO 15 oz/1000

Contains essential foliar nutrition, amino acids, beneficial bacteria, and Armament technology for a comprehensive solution to in-season maintenance. Promotes deeper, stronger roots for improved nutrient uptake and utilization, improved stress tolerance, and quicker recovery from heavy traffic.

PLUS
GRANULAR

Nature Safe® 10-2-8

100% all-natural and organic homogeneous fertilizer that is well suited for soils with nitrogen and potassium deficiencies. This formulation enhances root and shoot stability with controlled plant growth.

RATE: 5 lbs/1000, 220 lbs/acre

ATS 22-0-4 w/Armament®

OR

Contains 50% polymer sulfur coated urea (PSCU) and is coated with Armament for improved efficiency and nutrient uptake.

RATE: 150 lbs/acre

5 8TH WEEK:

Foliar-Pak® Play-On | RATE: 9 TO 15 oz/1000

Contains essential foliar nutrition, amino acids, beneficial bacteria, and Armament technology for a comprehensive solution to in-season maintenance. Promotes deeper, stronger roots for improved nutrient uptake and utilization, improved stress tolerance, and quicker recovery from heavy traffic.

6 10TH WEEK:

Rotate applications for week 6 and week 8, repeating every two weeks.

During periods of high traffic that require a boost for recovery, substitute Foliar-Pak Play On with Foliar-Pak Grow-In at 9 to 12 oz/1000.

AERIFICATION RECOMMENDATIONS:

Non-Disruptive Aeration | EQUIPMENT: Bayonet tines, 3/8" solid tines, or 1/2" solid tines

Perform every 3 - 4 weeks or more frequently for high traffic. Increases water and oxygen movement to root zone and opens channels for better root growth.

Core Aeration | EQUIPMENT: 5/8" coring tines or 3/4" coring tines

Begin core aeration 8 to 12 weeks after seeding and repeat at least 3 times per year. In situations where topdressing is being applied more heavily, use a 3/4" coring tine. Plugs should be mowed in order to preserve organic matter on the field.

This is a nutrient guideline for providing excellent sports turf surfaces. All situations vary. Based on soil test results, additional Foliar-Pak products should be tank mixed with Foliar-Pak Grow-In and Foliar-Pak Play-On to address soil nutrient deficiencies.
