

# OVERSEED/WINTER MAINTENANCE FOR GREENS

This program is designed to produce turfgrass of splendid color, great wear tolerance and limited top growth. Nutrients and carbon sources will be beneficial to warm season turf if temperatures favor its growth.

**Foliar-Pak® Armament® P 3-12-2** Phosphorus is essential for protein synthesis, cell division, and the development of new tissue. Armament P increases phosphorus availability by preventing common soil nutrient interactions that tie up phosphorus.

**Rate:**  
3 oz  
per 1000 sq ft

**Foliar-Pak® Amperage®** Sugars from natural molasses increase plant carbohydrates. These available carbon sources stimulate soil biological activity. Amperage provides an excellent color response and increases photosynthesis especially during low sunlight situations.

**Rate:**  
3 oz  
per 1000 sq ft

**Foliar-Pak® 1-0-15** Unsurpassed foliar availability of potassium for proper plant water relations and cell turgor pressure. L-amino acid package allows plant to respond optimally during drought and traffic pressures.

**Rate:**  
3 oz  
per 1000 sq ft

**Foliar-Pak® Foundation Forty** A highly concentrated blend of specific amino acids to increase plant energy, build proteins and improve carbohydrate storage. Improves plant metabolism, especially photosynthesis, and enhances the uptake of other nutrients and spray tank additions.

**Rate:**  
1 oz  
per 1000 sq ft

**MANUFACTURED BY:** ENP Investments, LLC • P.O. Box 618 • 2001 W. Main St. • Mendota, IL 61342 • Phone: 800.255.4906 • [www.foliarpak.com](http://www.foliarpak.com)

# OVERSEED/WINTER MAINTENANCE FOR FAIRWAYS

This program is designed to produce turfgrass of splendid color, great wear tolerance and limited top growth. Nutrients and carbon sources will be beneficial to warm season turf if temperatures favor its growth.

**Foliar-Pak® Armament® Concentrate 0-0-9** This is a powerful carbon source that works specifically to increase the availability of existing soil nutrients. Due to the great amount of negative charge associated with this carbon structure, many nutrients are unlocked from soils and made available for root uptake.

**Rate:**  
12 to 16 oz  
per acre

**Foliar-Pak® Foundation Forty** Targeted amino acids work to provide longer lasting color with lower nitrogen inputs. Amino acids impact cool season turf by increasing photosynthesis and nitrogen assimilation, increasing turf color and growth. For warm season turf, Foundation Forty builds better carbohydrate reserves through the winter.

**Rate:**  
0.5 to 1 oz  
per 1000 sq ft

**Foliar-Pak® Carbosential Fe Turbo 0.30-0-0** Provides timely delivery of iron through both foliar and root absorption. Delivers great color for extended period without increasing growth. It also feeds microbes working to improve biological activity through the winter months.

**Rate:**  
12 to 16 oz  
per 1000 sq ft

**Foliar-Pak® 30-0-0** An ideal nitrogen source for higher cut turf. With a low salt index and 60% controlled release, 30-0-0 is very safe providing a longer residual of N availability for controlled growth. Humectant properties increase foliar uptake of all tank mix products.

**Rate:**  
6 to 9 oz  
per 1000 sq ft

**MANUFACTURED BY:** ENP Investments, LLC • P.O. Box 618 • 2001 W. Main St. • Mendota, IL 61342 • Phone: 800.255.4906 • [www.foliarpak.com](http://www.foliarpak.com)
