

FALL ULTRADWARF FOLIAR

A foliar program that builds plant energy and facilitates steady growth under a variety of conditions or climates. At a time when warm season turf must be prepared for less sunlight and lower temperatures, this program focuses on maximizing carbohydrate reserves. Nutrients and carbon sources are specific to building better, stronger roots to help prepare turf for difficult winter conditions.

Foliar-Pak® Amperage Sugars from natural molasses provide energy to both plants and microbes. These available carbon sources stimulate biological activity in the soil and build carbohydrate reserves in the plant. Amperage provides an excellent color response and aids in thatch reduction.

Rate:
3 oz
per 1000 sq ft

Foliar-Pak® 1-0-15 Unsurpassed foliar availability of potassium for proper plant water relations and cell turgor pressure. L-amino acid package allows plant to respond optimally during drought and traffic pressures.

Rate:
3 oz
per 1000 sq ft

Foliar-Pak® Promote Concentrated sea plant extracts, humic acids and key nutrients work to increase root growth. Carbon sources work to enhance microbial proliferation improving nutrient availability.

Rate:
3 oz
per 1000 sq ft

Foliar-Pak® Foundation Forty A highly concentrated blend of specific amino acids designed to increase plant energy, build proteins and improve carbohydrate storage. Improves plant metabolism, especially photosynthesis, allowing plant to build and conserve carbohydrates during this critical time of season.

Rate:
1 oz
per 1000 sq ft

Optional:

Foliar-Pak® Calcium

1 to 3 oz per 1000 sq ft

MANUFACTURED BY: ENP Investments, LLC • P.O. Box 618 • 2001 W. Main St. • Mendota, IL 61342 • Phone: 800.255.4906 • www.foliarpak.com

FALL ULTRADWARF SOIL

This soil program is designed to deliver nutrients and unlock the nutrients that already exist in the soil to help prepare warm season turf for the difficult winter weather. This well-rounded soil spray helps plants regulate water use, store energy, and build better cell wall structures.

Foliar-Pak® Bio Sea A rich source of natural sea plant extracts that work to enhance new root growth, new shoot growth, and photosynthesis while delaying chlorophyll degradation.

Rate:
3 oz
per 1000 sq ft

Foliar-Pak® Armament® P 3-12-2 Phosphorus is essential for protein synthesis, cell division, and the development of new tissue. Armament P increases phosphorus availability by preventing common soil nutrient interactions that tie up phosphorus.

Rate:
3 oz
per 1000 sq ft

Foliar-Pak® Armament® K 0-0-24 Potassium controls the translocation of carbohydrates and plant osmotic relations and is integral to protein synthesis. Armament K is formulated with long chain carbon technology specifically designed to deliver potassium to plant roots.

Rate:
3 oz
per 1000 sq ft

Foliar-Pak® Gold Standard 45 By leveraging the strengths of amino acids, Gold Standard 45 is more water soluble than any of the current products on the market, allowing for a highly concentrated, low-use rate product.

Rate:
1.5 oz
per 1000 sq ft
