

BENTGRASS/POA (Northern)

Mixed stands of bentgrass and poa are difficult to manage due to the variability in the ecology of the two species. This program works to provide continuous, predictable color and controlled growth across a variety of turfgrass species/cultivars. Carbon sources are specific to building carbohydrate reserves and root structure to allow greens to thrive in the most difficult summer conditions.

Foliar-Pak® Foundation Forty | 1 - 2 oz per 1,000 sq ft

Foundation Forty is a highly concentrated blend of specific amino acids that increases plant energy, builds proteins, and improves carbohydrate storage. It also improves plant metabolism, especially photosynthesis, and enhances the uptake of other nutrients and spray tank additions.

Foliar-Pak® 11-0-11 | 3 - 6 oz per 1,000 sq ft

11-0-11 is a premium nitrogen source that provides a 1-to-1 N:K ratio and an L-amino acid package that nourishes highly maintained turfgrass. It also increases nitrogen fixation, chlorophyll production, and the formation of anti-stress compounds.

Foliar-Pak® Colonise® Bio | 1.5 oz per 1,000 sq ft

Colonise Bio is a highly specific blend of live biology, carbon sources, and nutrient enhancers. It contains Armament®, AminoPrecise®, and Colonise technologies to target better rooting, nutrient uptake, plant resilience, and turf playability.

Foliar-Pak® Minors | 1 oz per 1,000 sq ft

Minors is a complete micronutrient package formulated with specific carbon sources that increases nutrient uptake, improves the plant's defense mechanisms, and improves its tolerance.

Foliar-Pak® CSi L | 1 - 2 oz per 1,000 sq ft

CSi L is one of the most concentrated liquid silicon products in the market at 25% SiO₂ by weight. It is derived from silicic acid, and forms a low molecular weight silica polymer.
