

BENTGRASS (Southern)

The Foliar-Pak Bentgrass Southern Program is designed to deliver key nutrients and Foliar-Pak technology to turf to improve its summer stress tolerance. Growing cool-season turf in the transition zone presents major challenges. This program helps overcome those challenging growing environments by using targeted amino acid formulations to load stress-fighting osmolytes and antioxidants into the plant.

Foliar-Pak® Foundation Forty | 1 - 2 oz per 1,000 sq ft

Foundation Forty is a highly concentrated blend of specific amino acids that increases plant energy, builds proteins, and improves carbohydrate storage. It also improves plant metabolism, especially photosynthesis, and enhances the uptake of other nutrients and spray tank additions.

Foliar-Pak® Bio 12-6-6 | 3 - 6 oz per 1,000 sq ft

Bio 12-6-6 promotes rapid root growth and provides long-lasting color. It also helps to maximize the use of foliar and soil nutrients and provides bioactive ingredients which improve microbial activity and reduce fertilizer requirements.

Foliar-Pak® Magnesium | 0.5 - 1 oz per 1,000 sq ft

Magnesium uses specific amino acids to fully chelate the magnesium ion, which allows for maximum foliar entry into the plant.

Foliar-Pak® Manganese | 0.5 - 1 oz per 1,000 sq ft

Manganese with AminoPrecise® uses specific amino acids to fully chelate the manganese ion, which allows for maximum foliar entry into the plant.

Foliar-Pak® CSi L | 1 - 2 oz per 1,000 sq ft

CSi L is one of the most concentrated liquid silicon products in the market at 25% SiO₂ by weight. It is derived from silicic acid, and forms a low molecular weight silica polymer.

Optional Addition:

Foliar-Pak® Colonise® Bio | 1.5 - 3 oz per 1,000 sq ft

Colonise Bio is a highly specific blend of live biology, carbon sources, and nutrient enhancers. It contains Armament®, AminoPrecise®, and Colonise technologies to target better rooting, nutrient uptake, plant resilience, and turf playability.
