**Foliar-Pak® CSi L**

2-0-0 with 25% Si

---

**PRODUCT DESCRIPTION/BENEFITS**

Foliar-Pak CSi L is one of the most concentrated liquid silicon products in the market at 25% SiO₂ by weight. It is derived from silicic acid, and forms a low molecular weight silica polymer.

- Foliar-Pak CSi L is paired with a specific amino acid that acts as an osmolyte in the plant—which helps keep water in the cell, creating optimal turgor pressure and rigidity in the turf.
- Unlike other silicon products on the market, Foliar-Pak CSi L is tank-mix compatible with a variety of other products as it is built to not interact with other molecules in the spray tank.
- Owing to its small molecular weight and size, Foliar-Pak CSi L moves through the foliage very easily, unlike other silicon products such as silicates and slags that are not soluble, and therefore are not readily available for plant uptake and use.
- Silicon delivered from Foliar-Pak CSi L will increase plant turgidity, resulting in more upright growth, smoother surfaces, better green speed and better wear tolerance.

---

**GUARANTEED ANALYSIS**

Total Nitrogen (N) ........................................... 2.0%

2.0% Water Soluble Nitrogen

Derived from: soy protein hydrolysate

**NON-PLANT FOOD INGREDIENTS**

Silicon Dioxide (SiO₂) ................................. 25.0%

Derived from: colloidal silica

---

**PRODUCT INFORMATION:**

Weight per Gallon: 10.2 lbs (4.6kg)

pH: 8.5

---

**GENERAL USE GUIDE**

This product is tank mix compatible with most fertilizers and pesticides. However, due to variability in water sources and pesticide formulations a compatibility test is recommended.
