

Base Calcium

Foliar-Pak® Base Calcium is a highly concentrated calcium based on a proprietary dispersion and suspension process that includes polymers and sugars.

PRODUCT DESCRIPTION/BENEFITS

Foliar-Pak Base Calcium is a soil-applied product designed to fill the void between foliar calcium applications, and soil-applied granular applications. Providing more calcium than a foliar application, while being much smaller in particle size compared to a granular application, allows Foliar-Pak Base Calcium to begin working in the soil during in-season applications. With its small particle size, Foliar-Pak Base Calcium is easily solubilized and adsorbed to soil cation exchange sites.

In The Soil:

- Calcium has the ability to displace sodium ions on the soil colloid, and also buffer salts that may be present in the root rhizosphere.
- Calcium helps to push the soil platelets apart, creating a more suitable environment for aeration and root growth.
- Calcium is important in maintaining proper base saturation levels.

In The Plant:

- Calcium plays an active role in the uptake of water and nutrients.
- Calcium strengthens cell walls and works as a signal messenger.
- Calcium increases cuticular thickness and cell turgor pressure.

GUARANTEED ANALYSIS

Calcium (Ca) 20.0%
 Derived from: calcium carbonate

NON PLANT FOOD INGREDIENTS

Polyols 29.0%
 (Microbe Food)

PRODUCT INFORMATION:

Weight per Gallon: 14.0 lbs (6.3 kg)
 pH: 8.9

GENERAL USE GUIDE

Foliar-Pak Base Calcium is soil-applied product designed to fill the void between foliar calcium applications, and soil-applied granular applications. Providing more calcium than a foliar application, while being much smaller in particle size compared to a granular application, allows Foliar-Pak Base Calcium to begin working in the soil during in-season applications. This product is tank mix compatible with most fertilizers and pesticides. However, due to variability in water sources and pesticide formulations a compatibility test is recommended. Shake well.

Maintenance Rate (Greens, Tees, Fairways, Sports Turf)	Apply 1.5-6 oz per 1,000 sq ft in enough water to sufficiently water into the soil profile. Reapply weekly or biweekly during the growing season as needed.
---	---

Amendment Rate (Greens, Tees, Fairways, Sports Turf)	Apply 6-12 oz per 1,000 sq ft in enough water to sufficiently water into the soil profile. Reapply as needed per soil tests.
