

Foliar-Pak

Pond Additive

GENERAL USE GUIDE

Use to improve and maintain water clarity.

Initial Rate:

Apply 32 oz of Foliar-Pak Pond Additive per acre of water (6' deep) in 100 gallons of spray volume per acre. Apply with pressure (50 PSI is recommended) evenly across the surface of the water.

Repeat treatments every 10 days until optimal water quality is achieved.

Maintenance Rate:

To maintain water quality, apply 16 oz of Foliar-Pak Pond Additive per acre of water (6' deep) in 100 gallons of spray volume per acre. Apply with pressure (50 PSI is recommended) evenly across the surface of the water.
