

TEE/FAIRWAY (Warm Season)

Give your tees and fairways what they need and deserve to get through the grind of the long golf season. This program addresses the complete needs of larger acreage through the use of cutting-edge technologies, like Foliar-Pak Armament®. Armament will work for you in the soil by helping to buffer and unlock the potential below the turf surface. Also included are micronutrients with a great chlorophyll pack that immediately provide color and create energy.

Your Choice N Source | Desired rate

Foliar-Pak® Armament® Concentrate | 20 – 30 oz per A

Foliar-Pak Armament Concentrate contains Armament technology, our patented, biodegradable nutrient enhancer. Armament technology keeps nutrients in solution, preventing interactions in the spray tank and improving nutrient availability.

Foliar-Pak® Micros Plus | 0.5 oz per 1,000 sq ft

Micros Plus improves lateral growth of stolons and rhizomes and enhances foliar recovery. It also improves cell division, nutrient use, and photosynthetic properties and helps turf maintain a healthy green color.

Optional Addition:

Foliar-Pak® Amperage | 1 – 2 oz per 1,000 sq ft

Sugars from natural molasses in Amperage energize plants and microbes with available carbon sources that stimulate biological activity. Amperage also provides an excellent color response and aids in thatch reduction.
